

Product Sheet

LiveCast Lightning Dispatch...Real-time monitoring and switching of workforce video streams.

LiveCast Lightning Dispatch is a professional solution providing real time monitoring and switching of multiple incoming video streams. Switched streams can automatically be distributed to multiple web properties and to on-air broadcast feed.

Field personnel using mobile phones, netbooks or laptops, can stream high quality video and audio to LiveCast Dispatch, as events unfold. Back channel multi-way messaging between LiveCast users allows for instant communication without incurring SMS fees. LiveCast Lightning Dispatch provides low latency performance (one second on average), at a fraction of the cost and with minimal set-up time compared to traditional satellite delivery.

LiveCast Lightning Dispatch is integrated with all other LiveCast video streaming solutions, including LiveCast Lightning Duo.

Requirements

Windows Vista/XP
 LiveCast ASP enterprise accounts*
 Broadband data account

Key Features

- Monitor feeds and chat with multiple personnel in real-time.
- Switched Master Stream can be shared live with select contacts via direct link or posted to online blogs, social networks and accounts.
- Colleagues can view live stream from PC, Mac or directly on their mobile phone.
- Instant switching of video streams, regardless of the incoming source bit rate, codec, or resolution.
- Over 500 supported devices.
- Incoming streams can be re-encoded "on the fly" to a variety of industry standard bit rates, codecs, or resolution to meet specific audience requirements.
- Average one second latency.
- Master Stream is archived and available for download, editing and on-demand viewing.
- Network cascading of Master Stream allows near real-time networking of streams between remote stations.
- Support for Windows Media, QuickTime, Silverlight and Flash formats.

* Secured server accounts also available.
